

UV Spray Unit

Primary uses:

- Moulding and trim
- Door jambs and cabinet components
- Wood flooring

Patent No.: US 6,746,535
US 6,929,696

Our UVS-12 spray units provide precision coating on wood flooring and other materials, plus the capability for a smooth, consistent finish on uneven surfaces such as trim, mouldings, door jambs, & cabinet components. Our spray units are designed to meet your coating and spraying requirements.

Key features:

- Easy set-up and adjustment
- Can accommodate varying part dimensions without set-up changes
- Overspray recovery system
- Exhaust filter system

Solidly constructed for long term reliability, Dubois equipment is engineered with innovations to improve productivity and minimize clean-up, maintenance and downtime. It's manufactured in the U.S., to assure fast response and prompt availability of replacement parts from local suppliers.
