Dependable, accurate fluid and lubrication dispensing

Any equipment that moves must have proper lubrication: motor oil, hydraulic oil, brake and radiator fluid. Graco's metered dispensing systems are reliable, durable, and self-contained to dispense the correct material accurately and shut-off automatically. With automated dispensing and metering, you'll reduce manual steps and save labor costs. In addition, you'll get better end results and a higher quality product with the consistent shot accuracy of Graco's metering systems.

Sub-assembly and assembly

From smaller parts in sub-assembly to larger components in the final assembly process, Graco's manual, automatic or robotic dispensing equipment handles a variety of materials and applications, including the following:

- Sealants and adhesives to complete installation of cab windows
- Hot melt materials for interior cab components
- Sealing around grain bin weldments
- Silicone used in harmonic balancing of engine and transmission

Choose Graco

Graco is your best choice for durable, reliable fluid handling equipment. Not only have our products been tested and proven throughout the farm and construction industry, but they also easily integrate with your plant's current operation, help reduce material costs, and increase productivity.

The Graco commitment to excellence goes beyond superior products and performance. Our global network of certified Farm and Construction distributors and Graco sales representatives are available for comprehensive technical and service assistance.

THE RIGHT FLUID HANDLING EQUIPMENT FOR THE JOB

From fabrication to assembly, Graco provides fluid handling equipment for all phases of farm implement and construction equipment manufacturing. We work closely with leading coatings manufacturers and pre-test our equipment to ensure compatibility with the materials you use... materials such as sealants and adhesives, lubrication oils, corrosion inhibitors, polyurethane and epoxy coatings, and more. Since materials constantly change, this is key to anticipating new product requirements and responding with improved designs.

So no matter what type of equipment you're manufacturing - tractors, combines, bulldozers or backhoes - you can depend on Graco solutions for long-lasting, reliable performance.

Graco fluid handling equipment is hard at work in the manufacturing of:

- Tractors
- Combines
- Balers
- Hog pens
- Trenchers
- Backhoes
- Bulldozers
- Front loaders
- Industrial fork lifts
- Outdoor cranes
- Cement mixers
- Dump trucks
- And more

COUNT ON GRACO FOR

- **Durability.** Graco's long-lasting equipment means lower cost of ownership and faster return on investment.
- **Reliability.** Consistent performance from your Graco units reduces downtime, keeping your production lines running smoothly.

- **Efficiency.** Coatings are applied faster and more consistently using Graco spray finishing and coatings packages, saving time and material.
- **Waste Reduction.** Graco provides bulk transfer packages which allow materials to be purchased in quantity, resulting in less material waste and reduced clean-up costs.
- **Local Service.** Experienced and trained distributors provide quick access to quality parts and service, keeping your operation up and running.
- **Environmental Relief and Regulatory Compliance.** Using Graco equipment with compliant materials helps the environment and also provides a basis for environmental agency reporting, statistical process control data and inventory management information.

PROVEN SOLUTIONS FOR YOUR MANUFACTURING PLANT

Graco products and distributor support services provide you with the best solutions to handle and apply a variety of materials, whether it's a booth side package or a custom designed system for your production line. From pump to gun, drum to applicator, from circulating systems to electrostatic guns, Graco has the right equipment to do the job.

The right choice for fabrication and pre-treatment

In stamping operations, Graco pumps and spray guns apply mold release compounds, minimizing manual tasks and speeding production. During machining operations, Graco equipment delivers the proper amount of cutting/cooling fluid to extend the life of the tooling.

Surface preparation equipment

Before a part or component is painted, its surface must be prepared. Graco offers:

- Pneumatic or hydraulic pumps for high-pressure cleaning
- Replacement pumps which dispense chemicals for automated multi-stage washers

THE RIGHT CHOICE FOR FINISHING AND TOUCH-UP APPLICATIONS

For a top quality, beautiful finish, count on Graco equipment to move, measure and apply various paints and coatings. You'll get consistent results, with better quality finishes that stand up to corrosion, harsh conditions and tough working environments.

Graco equipment used in all stages of the finishing process

- Pneumatic and hydraulic pumps for mix rooms and booth side equipment
- Self-contained low, medium, and high pressure conventional and electrostatic guns that handle one or two-component paints in finishing lines
- A wide range of low, medium, and high pressure finishing and coating packages to suit every application
- Mechanical or electronic solutions for plural component applications
- Products for off-line spray and touch-up booths

ABOUT GRACO

First choice when quality counts

Founded in 1926, Graco is a world leader in fluid handling systems and components. Graco products move, measure, control, dispense and apply a wide range of fluids and viscous materials used in vehicle lubrication, commercial and industrial settings.

The Company's success is based on its unwavering commitment to technical excellence, world-class manufacturing and unparalleled customer service. Working closely with specialized distributors, Graco offers systems, products and technology which set the quality standards in a wide range of fluid handling applications including spray finishing and paint circulation, lubrication, sealants and adhesives along with power application equipment for the contractor industry. Graco's ongoing investment in fluid management and control will continue to provide innovative solutions to a diverse global market.
